

EBSCO Access Improvements for Schools

**funding for this database is provided by the Institute of
Museum and Library Services*

Authentication with Canvas

If your library uses CANVAS as your LMS, here is an [FAQ on the LTI for Canvas](#). And here are [instructions on how libraries can set up the LTI](#) themselves in EBSCO Admin. Or, school librarians can email our support team at support@ebSCO.com for help setting this up.

IP Authentication

If you are in school for face to face instruction and have trouble with your IP authentication, contact support@ebSCO.com for assistance in setting up IP authentication.

Authentication with a generic username and Password

If you are NOT a CANVAS school, all students can use the following credentials to login and then create a subaccount to save their work.

userID: VAlib

password: Read-2022!
